-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1644

DETAILED ACTION

1. Claim 12 links inventions I-III. The restriction requirement among the linked inventions is subject to the non-allowance of linking Claim 12. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP '804.01.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 13-24 and 27-30, drawn to a method of modulating antigen-specific T cells comprising inducing apoptosis of said T cells, classified in Class 424, subclasses 184.1 and 278.1.

II. Claims 13-23, 25, and 27-30, drawn to a method of modulating antigen-specific T cells comprising inducing anergy in said T cells, classified in Class 424, subclasses 184.1 and 278.1.

III. Claims 13-23 and 26-30, drawn to a method of modulating antigen-specific T cells comprising inducing proliferation of said T cells, classified in Class 424, subclasses 184.1 and 278.1.

3. Inventions I-III are different methods. Said methods would require different method steps, and result in different endpoints.

Note that it is unclear which of Claims 18-22 belong in each of the three groups set forth above. It is equally unclear how a single product, i.e., the aAPC employed in the method of the instant claims, could be used in such differing methods or

in the treatment of diseases such as autoimmune disease and cancer that would require essentially opposite types of treatment. Applicant's clarification of these issues would expedite prosecution.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.

7. **Please Note:** Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
